

BOWEL PREPARATION INSTRUCTIONS FOR THE FLEET PREP KIT #1

Please follow the instructions exactly.

Remove foil wrap from suppository. Lie on side (in “knees-to-chest” position). Insert rounded end of suppository into rectum first. Push gently as far as possible and against bowel wall. Wait 15 minutes before evacuating even if urge is strong. Suppositories are usually effective within 15 minutes to 1 hour.
Please note: If suppository is soft, put in refrigerator for 1 to 2 minutes.
